

AI Instruments & Economic Automation Strategy

End-to-End Autonomous Transformation Architecture for Businesses with 15 Years of
Macro-Economics and AI Engineering Experience

Corporate Solutions Catalog • Project Projection: 2026

Who is Gor Sargsyan?

Economist & AI Solution Architect

Gor Sargsyan has specialized in financial analysis, market dynamics and macro-economic modeling over 15+ years. Combining software evolution with AI engineering, he delivers autonomous systems focused on **direct profitability (ROI)**, not just code.

Education & Academic Background

Graduate of the Economics Department at the National Polytechnic University of Armenia. After building his academic foundation in economics, he completed **AI Engineering** training, uniting both disciplines under one roof.

Global Experience

Designed corporate financial automations, intelligent data models and scalable AI agents across Spain, Russia and Europe.

- NPUA Economics Graduate
- AI Engineer
- 15 Years Finance Experience
- AI Solution Architect
- Agentic Workflow
- B2B Marketing Strategy

Global Success Metrics & Evidence

24+

CORPORATE
INTEGRATION

€140K+

ANNUAL AVG. CLIENT
SAVINGS

98.4%

AUTONOMOUS FLOW
SUCCESS

Marketing & Economics Report: Developed AI ecosystems automate up to 70% of manual data entry and customer support, permanently lowering operational cost curves.

70% Automation Target

\$ ROI Savings Amplitude — Individual to Enterprise

From solo sellers to large sites and digital marketing teams — annual savings range scales with business size

SMALL BUSINESS / INDIVIDUAL

€24K – €87K

Solo seller, low inquiry volume, basic automation

MID-SCALE

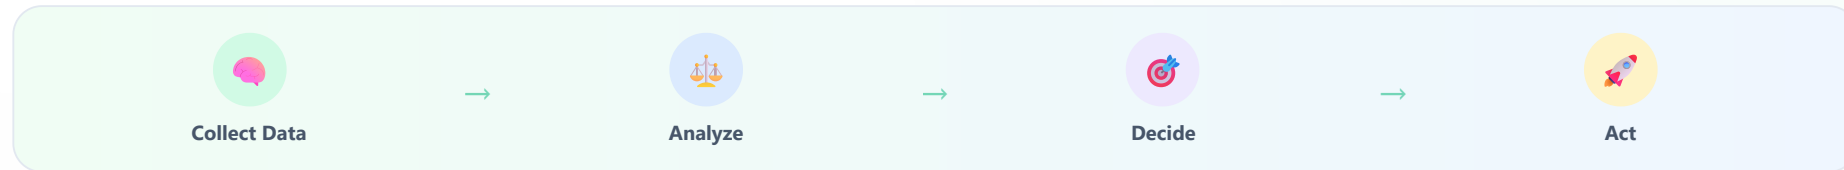

€80K – €350K

Growing site, multi-channel sales and support operations

AI Agent Advantage: No payroll costs, no holidays, no salary demands — they work 24/7 without interruption. They convert overnight and weekend inquiries that human teams miss, at no extra cost.

AI Agents and Varieties

Autonomous Sales Agents

Unlike simple reply bots, they reason through customer budgets and needs, close sales and generate payment links.

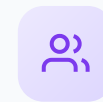

- Dynamic Pricing Capability
- Customer Segmentation Analysis
- Closing-Focused Dialog Flows

Sector Operations Agents

Systems handling back-office workloads, e-commerce inventory, logistics routing and financial reconciliation without human intervention.

- ERP & CRM System Integration
- Automatic Anomaly Alerts
- Continuous Learning Reporting Cycle

Bidirectional Customer Agents

Autonomous support agents simulating brand identity and FAQ memory in 5 languages with 100% accuracy.

- 0% Missed Overnight Operations
- Sentiment Analysis
- Instant Solution Generation Cycle

Autonomous Sales & Support Agents — Varieties

Five core agent types configured for your business role and scenario

Assistant Agent

Personal assistant agents that autonomously manage appointments, follow-ups and daily operations.

Moderator Agent

Content filtering, rule enforcement and interaction moderation in communities, groups and channels.

Target Audience Agent

Marketing agents that analyze customer segments and deliver personalized messages and offers to the right audience.

Educator Agent

Teacher-type agents that deliver product onboarding, user training and interactive learning modules.

Professional Agent

Industry-specific expert agents providing professional consulting in finance, legal, healthcare and technical fields.

AI Bots and Varieties

WhatsApp

Telegram

CRM

Alert

WhatsApp & Telegram Bots

Gatekeepers capturing, filtering and collecting traffic from social and messaging channels in the first second.

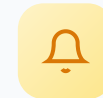

- API-Based Official Integrations
- Dynamic Menu & Form Designs
- Transfer Hot Leads to CRM

Data Collection & Scraping

Smart bots tracking competitor prices, global trends and financial movements for market analysis.

- Price Tracking & Competition Analysis
- Instant Alert Systems
- Unstructured Data Organization

Trigger & Notification Bots

Assistants instantly reporting internal operations (stock depletion, high-volume orders, server errors) to admin panels.

- Instant SMS / WhatsApp Report
- Critical Threshold Checks
- Automatic Task Assignment

Large-Scale Sites: Front, Back & Admin Office

 Front Office — Visitor

 Back Office — Data & API

Front Office (Visitor Area)

Ultra-fast, SEO and AI-friendly interface architectures for users.

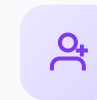

- Fast Click Reactions
- Dynamic Language Detection
- Micro-Interaction UI Polish Rules

Back Office (Data & Processing Layer)

The heart of database optimization, API integrations and secure server-side architecture.

- Advanced Security Protocols
- Fast Data Query Structure
- Third-Party API Integration Layer

Admin Panel (Management Ecosystem)

AI-powered analytics panels for owners and managers to monitor operations from a single screen.

- One-Click Financial Report Output
- User Role & Permission Management
- AI-Powered Forecasting Modules

Next-Gen E-Commerce Systems

AI-Powered Conversion Architecture

Smart e-commerce infrastructures generating instant offers based on visitor behavior, beyond classic cart logic.

- **Cart Abandonment Barrier:** Dynamic AI discount hooks triggered when users leave the site.
- **Personalized Recommendation:** ML-based storefront layout based on browsing history.
- **End-to-End Integration:** Full automation with payment systems (Stripe, PayPal) and shipping APIs.

Visitor Traffic

Product Browsing

+34%

CART CONVERSION INCREASE

One-Click Global Sales

Smart corporate e-commerce updating prices and stock in 5 languages, compliant with local tax regulations (VAT).

Landing Page Differences for Large and Small Businesses

VS

Small Businesses (Fast Lead Capture)

Frictionless CTA-focused structures quickly directing users to WhatsApp or forms.

- Clear Value Proposition in 3 Seconds Max
- Direct Phone & Message Focused Design
- Lightweight Code & Maximum Mobile Speed
- Budget-Friendly, High-Performance Setups

Large Enterprises (Authority & Data Integration)

Corporate prestige landing pages with deep tracking (Pixel, GA4, Server-Side Tagging) and full CRM funnel integration.

- Multi-Language & Location-Based Dynamic Content
- Corporate Trust Elements (Case Studies, Documents)
- Interactive Demo (Sandbox) Modules
- Flawless Load Balancing Under High Traffic

Live Project Examples & Success Stories

Hamov Bakery Integration

AI-powered operational management project connecting production lines and customer demands for the bakery and food retail sector.
